SEARCH NOTES (INCLUDING SEARCH STRATEGY)

	DATE	EXMR
Consult with Carl Friedman class 52	5/17/2004	na
Consult with Neil Wilson class 411	5/17/2004	na
Consult with John Cottingham class 403	5/17/2004	na

1. The first step in the process is to identify the problem or issue that needs to be addressed. This involves gathering information and understanding the context of the problem.

2. Once the problem is identified, the next step is to define the objectives and goals of the project. This helps to clarify what needs to be achieved and provides a clear direction for the team.

3. The third step is to develop a plan or strategy to address the problem. This involves breaking down the problem into smaller, manageable tasks and determining the resources needed to complete each task.

4. The fourth step is to implement the plan. This involves putting the strategy into action and monitoring progress regularly to ensure that the project is on track.

5. The final step is to evaluate the results of the project. This involves comparing the actual outcomes with the original objectives and goals to determine the success of the project.
